PVC/rPET Card

85.4 × 53.8 mm

Step-by-step Instructions

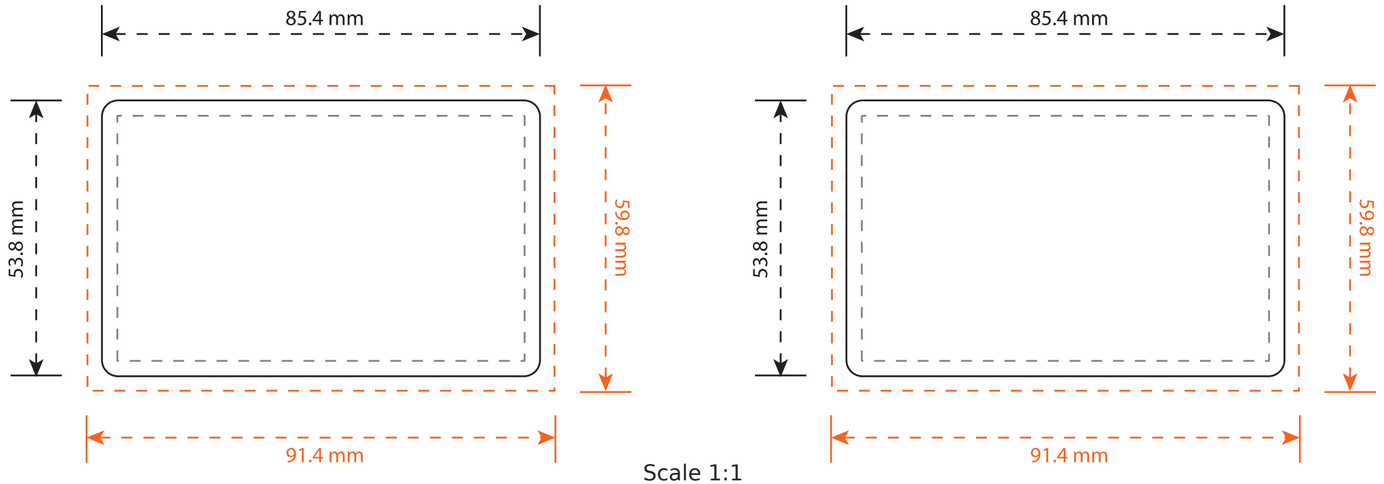

1. Keep the document size unchanged and create your artwork in the “Artwork” layer. Use the printing process colours CMYK (for Digital/Offset CMYK), or one to four colours from the PANTONE+ Solid Coated library, with full coverage or 100% tint (for Offset PMS).
2. Save the file as a PDF without crop marks or additional bleed. Preferably use the PDF/X-4:2008 preset.
3. Check your PDF carefully before submitting it.

Not working in Adobe Illustrator? Remove everything that should not be printed. Also delete the “Template” and “Information” layers.

Submit your file at the exact size of 91.4 × 59.8 mm.

Legend

- Bleed size; also the required file size
- Final trimmed size
- Recommended safety margin
- Printable area
- Fold or crease line
- Items in this colour are for illustration only.
- Items in this colour are (semi-)transparent.
